

THERMO SADDLES – Flexi Duct Support System

- This system eliminates the kinks and bends that so often reduce the A.C systems design efficiency. Install better with Thermo Saddles.
- One size fits all, or link together to fit any duct diameter.

Parts sold separately or for real value, order the Flex Duct Saddle kit, which comes complete with 25 saddles, buckles and 50 Pins

Optional Products

- Use the Thermo Buckles with the 25mm button lok strapping to make a tight, secure support.
- Simply slide the 25mm Button Lok strap into the buckle and adjust to the desired height. Then insert the two self-locking pins through the aligned button lok strapping holes...It's that easy!!

Product	Part #	Size
